1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 5,091,920 issued to Ikeda et al ('920).

Considering claim 1-3, '920 appears to clearly anticipate that claimed. See abstract, figure 10 and its description.

Considering claim 4, although '920 does not appear to teach measuring the time to get its value, '920 does appears to teach the claimed limitations further considering that the circuitry described therein would have an inherent "predetermined [minimum] time interval" (based on to the inherent properties of that circuitry).

Considering claim 5-7, see rejection to claim 1. Also see figure 14 and its description.

Considering claim 8, see rejection to claim 4 above.

Considering claim 9-10, see rejection to claims 1 above.
